WHY IT COSTS THIS LITTLE

We launched Scenekind this year. We would rather have ten brands holding finished work — and a case study each — than a price list nobody has tested. The same scope is two credits — \$600 à la carte. This sits below that, and below what it costs us to make. That is deliberate, and it runs once per brand.

CAPACITY Six sprints a month. One per brand.

Or simply twenty product ads.

THE DETAILS

What you're agreeing to

HOW IT WORKS

Brief, then concept and script approval, then production, then delivery. Nothing is produced until you approve the direction in writing.

WHAT'S INCLUDED

Creative direction, scripting, art direction, AI production, edit, sound design and grade. Masters in 9:16, 1:1, 4:5 and 16:9 on every deliverable.

WHAT WE NEED FROM YOU

Product images or your product page, logo files, brand colours and fonts, and any claims you must make or avoid. If you have no brand assets, we work from your store.

AI TALENT AND LIKENESS

On-camera people are AI-generated composites. We do not replicate a real identifiable person, and will not produce a look-alike of a public figure.

CONCEPT REVISIONS

Unlimited at the concept stage. Changing direction before production costs nothing — that is the cheapest moment to change it.

ASSET REVISIONS

One round on the Starter Sprint. Two on packages and monthly plans. Additional rounds are \$150 each.

OWNERSHIP

You own full commercial rights to every delivered asset on final payment. No usage fees, no expiry, no per-platform licensing.

PAYMENT

Sprint: invoiced on delivery, cancellable.
Packages: 50/50. Monthly: billed in advance, 30 days notice.

PROBABLY NOT A FIT IF...

You need a real, named person on camera. You need documentary footage of your actual premises, staff or process. You are in a category where AI-produced imagery is restricted by the platform or your regulator. In those cases we will say so on the call rather than take the brief.

See the quality before you commit anything.

Reply **SPRINT** and we send back a concept direction for one of your products within 24 hours. If you like it, we make it. You pay on delivery — and only if you would actually run it.
